Re: iCrimeFighter Recommendation/Endorsement

To All Law Enforcement Partners:

I am writing to urge all District Attorney Offices and Law Enforcement agencies to strongly consider implementing the iCrimeFighter (ICF) system into your daily work force. ICF's professionalism and desire to make all of our lives easier has been much appreciated.

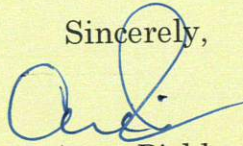

Below are key advantages we have found using iCrimeFighter:

1. Discovery – The case file in your law enforcement agency is immediately accessible to the DA and sending Discovery is simplified by selecting the files and emailing them to defense counsel;
2. Customer Service – We have been very impressed with the ICF response to our questions, concerns and issues and they have made it a priority to address said issues in a timely manner;
3. No more CD/DVD burning to send discovery to defense attorneys. As we used to spend so much time preparing items, now we can easily send a secured downloadable link. This link will also let us know when the receiving person downloads the case.
4. Everything is in one spot, and we are notified from the iCrimeFighter system when a case is shared to our office from law enforcement.
5. iCrimeFighter has a complete case history of all items uploaded and by who. This makes our work very easy when we are doing our review of the case.
6. Storage is provided and can be easily linked to any case management system.

7. We can easily access our account from anywhere.

We all struggle with changes in technology, but we have found that the iCrimeFighter has simplified and improved our intake process. The iCrimeFighter team has been very willing to listen to our needs and change or develop new technology to help improve our processes, and we are very appreciative of their efforts.

Sincerely,

Anne Pickle
